

## Table of Contents

<i>Preface</i> .....	V
<b>INTRODUCTION</b>	
<b>Allan I. Carswell</b> <i>Lidar Imagery – From Simple Snapshots to Mobile 3D Panoramas</i> .....	3
<b>Jack Ickes</b> <i>Hexagon Geosystems – A Solution for Every Application!</i> .....	15
<b>Johannes Saile</b> <i>High Performance Photogrammetric Production</i> .....	21
<b>Hubert Minten</b> <i>News from IGI</i> .....	27
<b>Alexander Wiechert, Michael Gruber</b> <i>UltraCam and UltraMap – Towards All in One Solution by Photogrammetry</i> .....	33
<b>Susanne Becker</b> <i>Towards Complete LOD3 Models – Automatic Interpretation of Building Structures</i> .....	39
<b>Dieter Fritsch</b> <i>A Synopsis of the Carl Pulfrich Award</i> .....	57
<b>DIGITAL MAPPING CAMERA EVOLUTION</b>	
<b>Michael Cramer</b> <i>Geometry Perfect – Radiometry Unknown?</i> .....	65
<b>Ruedi Wagner</b> <i>Leica ADS80 and Leica XPro: A Total Solution for Photogrammetric Mapping</i> .....	79
<b>Ruedi Wagner</b> <i>The Leica RCD30 Medium Format Camera: Imaging Revolution</i> .....	89
<b>Klaus J. Neumann</b> <i>The Z/I DMC II – “Imaging Revolution”</i> .....	97
<b>Michael Gruber, Martin Ponticelli, Alexander Wiechert</b> <i>UltraCam, A Brand for Continuous Developments</i> .....	103
<b>Bernd Eissfeller, Dominik Dötterböck, Stefan Junker, Carsten Stöber</b> <i>Online GNSS Data Processing – Status and Future Developments</i> .....	111

<b>Werner Mayr</b> <i>Unmanned Aerial Systems in Use for Mapping at Blom</i> .....	125
<b>Henri Eisenbeiss</b> <i>The Potential of Unmanned Aerial Vehicles for Mapping</i> .....	135
<b>Jens Kremer</b> <i>Power Line Mapping: Data Acquisition with A Specialized Multi-Sensor Platform</i> .....	147
<b>Marco Weber</b> <i>TANDEM-X: A New Area of Global Digital Elevation Data</i> .....	155
<b>Konrad Schindler, Haris Papasaika-Hanusch, Stefan Schütz, Emmanuel Baltsavias</b> <i>Improving Wide-Area DEMs Through Data Fusion – Chances and Limits</i> .....	159
<b>POINT CLOUD GENERATION AND PROCESSING</b>	
<b>Heiko Hirschmüller</b> <i>Semi-Global Matching – Motivation, Developments and Applications</i> .....	173
<b>Norbert Haala</b> <i>Multiray Photogrammetry and Dense Image Matching</i> .....	185
<b>Tobias Heuchel, Andre Köstli, Charles Lemaire, Dietmar Wild</b> <i>Towards a Next Level of Quality DSM/DTM Extraction with MATCH-T</i> .....	197
<b>Juha Hyypä</b> <i>State of the Art in Laser Scanning</i> .....	203
<b>Andreas Ullrich, Martin Pfennigbauer</b> <i>Echo Digitization and Waveform Analysis in Airborne and Terrestrial Laser Scanning</i> .....	217
<b>Lewis Graham</b> <i>Aerial and Mobile Point Cloud Integration – An Industrial Perspective</i> .....	229
<b>Ronald Roth</b> <i>Leica ALS70 – Point Density Multiplication for High Density Surface Acquisition</i> .....	249
<b>TOWARDS 3D AUGMENTED WORLDS</b>	
<b>Jan-Michael Frahm, Pierre Fite-Georgel, Enrique Dunn</b> <i>State of the Art and Challenges in Crowd Sourced Modeling</i> .....	259
<b>H. Chris McGregor, David S. Mitchell, Lyn Wilson, Douglas K. Pritchard</b> <i>Two Avenues for Data: Rosslyn Chapel as A Terrestrial Scanning Case Study</i> .....	267
<b>Bart Beers</b> <i>Collection and Application of 2D and 3D Panoramic Imagery</i> .....	277

**Christoph Strecha***The Accuracy of Automatic Photogrammetric Techniques on Ultra-Light UAV Imagery* ..... 289**Florian Siegert***Very Advanced 3D Landscape Models* ..... 295**Dieter Fritsch, Ali Mohammad Khosravani, Alessandro Cefalu, Konrad Wenzel***Multi-Sensors and Multiray Reconstruction for Digital Preservation* ..... 305

List of Authors ..... 325

Appendix: Synopsis of the Photogrammetric Weeks ..... 329
