

## Table of Contents

<i>Preface</i> .....	V
<b>INTRODUCTION</b>	
<b>Dieter Fritsch</b>	
<i>Some Stuttgart Highlights of Photogrammetry and Remote Sensing</i> .....	3
<b>John Welter</b>	
<i>Sensors to Solutions – Data to Information</i>	
<i>Providing Accurate Answers Fast is Crucial</i>	
<i>An Overview</i> .....	21
<b>Tim Lemmon, Christian Hoffmann</b>	
<i>Expanding Solutions for Photogrammetric and Remote Sensing Professionals</i> .....	33
<b>Philipp Grimm</b>	
<i>IGI – Integrated Geospatial Innovations</i> .....	39
<b>Alexander Wiechert, Michael Gruber</b>	
<i>UltraCam and UltraMap – An Update</i> .....	45
<b>Werner Mayr</b>	
<i>UAVs for Production</i> .....	51
<b>Yuri Raizman, Adi Gozes</b>	
<i>VisionMap A3 Edge – A Single Camera for Multiple Solutions</i> .....	57
<b>Chance Michael Coughenour, Dieter Fritsch</b>	
<i>The Marie Skłodowska-Curie ITN-DCH Project – Overview and Scientific Work</i> .....	65
<b>REMOTELY SENSED DATA ACQUISITION – AN UPDATE</b>	
<b>Fabio Remondino, Markus Gerke</b>	
<i>Oblique Aerial Imagery – A Review</i> .....	75
<b>Georg Bareth</b>	
<i>3D Data Acquisition to Monitor Cropping Systems: Sensors and Methods</i> .....	85
<b>Wolfgang Wagner</b>	
<i>Big Data Infrastructures for Processing Sentinel Data</i> .....	93
<b>Norbert Pfeifer, Gottfried Mandlbürger, Philipp Glira, Andreas Roncat, Werner Mücke, András Zlinszky</b>	
<i>Lidar: Exploiting the Versatility of a Measurement Principle in Photogrammetry</i> .....	105

<b>Norbert Haala, Mathias Rothermel</b> <i>Image-based 3D Data Capture in Urban Scenarios</i> .....	119
<b>Ismael Colomina</b> <i>On Trajectory Determination for Photogrammetry and Remote Sensing: Sensors, Models and Exploitation</i> .....	131
<b>Heiko Hirschmüller, Korbinian Schmid, Michael Suppa</b> <i>Computer Vision for Mobile Robot Navigation</i> .....	143
<b>Christian Heipke, Franz Rottensteiner</b> <i>Image Analysis Based on Probabilistic Models</i> .....	155
<b>Helmut Mayer</b> <i>From Orientation to Functional Modeling for Terrestrial and UAV Images</i> .....	165
<b>Konrad Schindler, Wilfried Hartmann, Michal Havlena</b> <i>Recent Developments in Large-scale Tie-point Search</i> .....	175
 <b>ADVANCED MODELLING IN PHOTOGRAMMETRY, COMPUTER VISION AND COMPUTER GRAPHICS</b>	
<b>Andrew Pevar, Lieven Verswyvel, Stamatios Georgoulis, Nico Cornelis, Marc Proesmans, Luc Van Gool</b> <i>Real-time Photometric Stereo</i> .....	185
<b>Patrick Tutzauer, Michael Klein</b> <i>The 4D-CH Calw Project – Spatio-temporal Modelling of Photogrammetry and Computer Graphics</i> .....	207
<b>Daniel Thalmann, Hui Liang, Junsong Yuan</b> <i>Hand Motion and Grasping: Capturing, Recognizing and Synthesizing</i> .....	213
<b>Hans-Gerd Maas</b> <i>Photogrammetric Techniques for Spatio-temporal Analyses of Glacier Motion Patterns</i> .....	229
<b>Manfred Buchroithner</b> <i>High up and Deep below – Dynamic 3D Cartography at the Roof of the World and in Sea-Level Caves</i> .....	235
<b>George Vosselman, Sander Oude Elberink, Marc Post, Jantien Stoter, Biao Xiong</b> <i>From Nationwide Point Clouds to Nationwide 3D Landscape Models</i> .....	247
<b>Clive Fraser</b> <i>Advances in Close-Range Photogrammetry</i> .....	257
<b>Yvain Tisserand, Nadia Magnenat-Thalmann</b> <i>Image-based 3D Avatar for Virtual Try-on Applications</i> .....	269

---

<b>Thomas Ertl, Thomas Müller, Dennis Thom</b> <i>GeoVis – From Terrain to Tweets and Movements</i> .....	281
<b>Kurt Rothermel, Frank Dürr</b> <i>Public Sensing – Using Your Mobile Phone for Crowd Sourcing</i> .....	293
<b>EXCELLENCE IN GEOINFORMATICS</b>	
<b>Liqiu Meng</b> <i>Mobility and Visuality of the Digital World</i> .....	307
<b>Jan Behmann, Anne-Katrin Mahlein, Lutz Plümer</b> <i>Early Identification of Plant Stress in Hyperspectral Images</i> .....	317
<b>Monika Sester, Udo Feuerhake, Colin Kuntsch, Stefania Zourlidou</b> <i>Interpretation of Moving Point Trajectories</i> .....	329
<b>Thomas H. Kolbe, Barbara Burger, Berit Cantzler</b> <i>CityGML goes to Broadway</i> .....	343
<b>Ralf Bill</b> <i>Geoinformatics and e-Science</i> .....	357
<b>Marguerite Madden, Thomas Jordan, David Cotten, Nancy O’Hare, Alessandro Pasqua, Sergio Bernardes</b> <i>The Future of Unmanned Aerial Systems (UAS) for Monitoring Natural and Cultural Resources</i> .....	369
List of Authors .....	387
Appendix: Synopsis of The Photogrammetric Week Series .....	393
